Short service. I stayed at the house till about 30 'clock when Duncan drove me home. Isabel came with us to get some cookies. after tea Charles and I went to the Lyceum lecture "The Making of Worlds" by Dr. Carpenter of Seattle. Very good - Only 1600 Stars can be seen on a clear night. Worlds travel ~~14~~ 184,000 miles a second. 30 years of age light from ~~Milky Way~~ Moon reaches your eye - Started to come when you were born. 30,000 Suns in the Milky Way each thousands of times larger than our sun, all water & air gone from moon because gravity not strong enough to hold it done. water & air on earth - gradually departing. Some day be like moon. Earth - called a wart - in Mark Twain's story. We are atoms of dust - crawling over the surface
