

which didn't cover very well. This after noon he ran the furrows and cross ditches. Vernon brought Rebecca over this morning but they didn't stay very long. I did my best to make friends with Rebecca but she wouldn't have anything ~~whatever~~ to do with him. Lila was over and we took Rebecca & Liddam out to show them the animals. He explained every thing to her but she turned a deaf ear to him. Betty came over with Harry and Gint and went back with Vernon, who said if the roads didn't get better she couldn't bring the baby carriage over again. & he started toward yesterday but couldn't make it. He didn't know about coming through Martin's. Lila went down to the Ryans and spent the day. This after noon Harry, Gint, Frank, Billy Garwell and I went back to the woods. They had their guns but didn't shoot any thing much. Gint shot a kitten which Frank brought home to eat and also a crow. Harry and I went over to John West's to take a look at his corn-horse and he told us to take it home and use it as he has no corn to cut this year. He isn't through seeding yet. He and old Robert John were harrowing on a six acre field which if the weather permits he wants to get in on Monday. When we got back we fixed up the gap from the alkali field into the gully. Dad was still running out furrows and Harry Harding was with him.

He has to go back West on Wednesday although his mother isn't much better. Val. Tracy came over this after noon to see dad about some thing so as there wasn't much for Harry to do, he, Gint, Lila and Billy all jumped on Val's dray and rode home. I dug a little more before it was time to do chores. Frank took in the sale of Winkey Smith's stuff this after noon, but the stove was too small for what she wanted, but Cousin Beasy told her that they had one for sale and wants. Dad. to take a look at it. She bought a set of bed springs. Frank and I drove down to night as I needed a hair cut and Frank had to get some groceries. We went around to Smith's to get the bed springs but they weren't there so Effie told us that some fellow that <sup>lives</sup> in the brick house way up St. Patrick St. must have them as he had sent word that he had a set delivered to him which he didn't buy so Frank and I went up there and found the springs on the veranda, and as there was no one home left word with the neighbors and carried them down to Harry's and put them in the wood shed. It was pretty late when we got home. Dick got home soon after with "Larned's History of the World" in five volumes & a dandy big war-map all of which he got for \$1.95 and some coupons out of a newspaper. We got a letter last night from Auntie saying they all hoped to be home here about the end of October. It has been pretty sunny but a cold wind all day.
