

Wednesday June 9th

We didn't do any thing much this morning but putter around and talk about going down town but Dad. was pretty lame so we didn't get around to it till after dinner. This after noon Dad. & Sid. & I went down in the waygon and were down most of the after noon. Aunty didn't come home with us but walked home to tea. Dad. went to the doctor and got an electric shock on his sore back and some medicine. I got a roll of poultry netting and Mr. James loaded up the waygon with boxes. We saw Bruce up the street a little farther and were talking to him for quite awhile. Dad. & Bruce held a sort of court of advice on Main St. as farmers from all over came flocking around with tales of woe concerning their live stock. Aunty didn't come home with us but walked over. Winnie & Brock Jack came over to tea. Mrs. & Miss Woodson were in for a minute or two after tea before going to a bridge party at Mrs. Martin's. We had some music this evening but the girls went home early. Frank & I went down town with them this day.

Thursday June 10th

This morning we hooked up the team and Dad. & I went down to Flemming's to get another load of shingles. We

took Sid. with us. Just as we got there we noticed that our colts were out of the gully and in the field so I struck right across to put them back but I couldn't head them off alone and so they got out on the road and ran up the lane to the house. There with Enah & Aunty Celie's help I managed to get them into the barn yard. I had to go back to the gully and fix up the place where they got out. I took the shot gun with me in case there were crows in the corn field but there weren't so I went on over to the woods but didn't see one. It was nearly noon when I got back but Dad. & Sid. weren't home yet so I walked over to see if they were waiting for me but just as I got there they had left but I ran across Dipse and he kept me in conversation for half an hour. Aunty & Aunty Celie went over to Mrs. Battersby's for dinner in honor of Mrs. Spey's birth day. This after noon Dad. & I took a strand of barbed wire and stretched it over the piece of fence where the colts broke out. and fixed it a little better. It was in the middle of the new gully fence where we left a place for gates but only stretched a piece of wire by hand. I think old Dandy probably caught his foot in it. Dad. felt quite a bit better in his back to day but felt a little sick. Nice day.
