338 DAYS PAST

28 TO COME

Collapse.

After such drugs as strophanthus, caffeine, camphor, etc., have failed in cardiac insufficiency, M. John recommends intravenous injection of adrenalin chloride solution, half to one c.c of a one per cent. solution, i. e., 1/1,000 solution diluted with ten parts of normal salt solution—*Exch.*

Weather

Temp.

cold,
Aleta was here & little
John, came for dinner
I took the girls & went
for them. We hung
the washing out but
they froze hard, but
Mabel brought them in
& we dried them &
ironed some. John
helped Billy some with
the rats & Mark a little
Billy 6- Mariah 5-
