

**Saturday, October 24**

297 DAYS PAST

68 TO COME

**"The Rapid Recovery Was Pleasing."**

A physician in one of the large towns of Ireland writes: "I tried **Pepto-Mangan (Gude)** in a case of extreme prostration, with severe anemia. The patient was vomiting all except the lightest articles of diet. Her rapid recovery was certainly pleasing; the sickness abated and disappeared in a few days, and afterwards rapid recovery was perceptible."

**Weather**

**Temp.**

Rained a little this morning. I went to King and to mill with Del Bill & the buggy. Then Maudie, Melba & I went to Ayler. Melba went to Mrs Conshells. Pa ploughed all the time. It was not raining.
