

greatly increased at the idea of not playing after tea on the 1st of July as he had never know of such a thing before so we came back for an hour and gave quite a little concert. Doc. didn't show up though as he had a date with Lou Dixon. Miss & Harry Moore saw the thing. I didn't see much of what went on all day but they had a big baby show and Docer won first money in the baseball tournament and I guess the other sports were good. It was a fine day not too hot and yet warm enough for the boys at the beach to be pretty well patronized. Dad. didn't come down town all day but came down at night. I didn't go to see Marj. off to night but the rest did.

Friday July 2nd

Pres. Lampkins came down this morning and put a new top on the windmill as the box is getting badly worn on the old one. Dad plowed up the old strawberry patch in the garden and worked it down and this afternoon cultivated corn. I raked up the hay Frank cut in the orchard and cooked it up this morning and cut a little more lawn. This afternoon I cleaned out another row of mangels. Frank has felt pretty tough all day but tried his new cultivator out. It doesn't go just right yet. Mr. & Mrs. Jones. Elva and Brant were all over here for tea. Cloudy all day warm

Saturday July 3rd

I finished cutting the lawn this morning and spent the rest of the day thinning mangels. I just got two more rows done. Dad. set out cabbage plants all day so we should have a good supply of them. Frank still feels pretty tough and hasn't done anything much all day. I did another show card lesson to night but made a bad job of it. Hot this morning but very windy this afternoon.

Sunday July 4th

Frank, Ed and I went down to Sunday school. Frank ran the library and I took Maria's class, but didn't feel as if I made much of a job of it. Dad. went down early this morning and drove Aunty & Aunty Alice up to the cemetery. I had dinner at Aunty's and this afternoon went with the land up to the cemetery as this was the Odd Fellows' Decoration Day. We went up on the three o'clock car and came back on the five. Dad. Ench and Sid drove down to night and took Aunty Alice her milk. Frank and I went to bed early. Very cool. Mr. & Percy Millman were over this morning for a while.

Monday July 5th

I hauled mangels all day and just got two more rows done. Dad. and Frank spent the day cultivating corn. Frank has had quite a time adjusting his two row cultivator. It seemed to pull very heavy and not dig in
