March 17, 1907.

Dr. Hommelsheim, Staedt Mariahilfspital, Aix-la-Chapelle, Germany, says:

"I am glad to inform you that I have employed **Pepto-Mangan (Gude)** with excellent results. Its prompt action was particularly remarkable in women after profuse hemorrhages, and in a case of a greatly anemic patient after laparotomy for a ruptured tubal pregnancy. The preparation was always willingly taken and well tolerated."
