48 DAYS PAST

Monday

318 TO COME

"Don'ts" in Appendicitis. No. 1.

1. Do not treat your patient medicinally; *a*, when there are signs of peritonitis, *b*, when the temperature keeps on increasing, *c*, when a distinct tumor is felt in the right iliac fossa, *d*, when the pulse is slow, temperature low with local signs of peritonitis, and the appendix is becoming gangrenous, *e*, when there is sudden absence of pain, *f*, when the mononuclear percentage is over thirty, *g*, when acceleration of pulse is out of proportion to temperature, *h*, when the symptoms are severe soon after onset, *i*, when there have been previous attacks.—Chideckel; Med. Record.

Weather

Temp.

Cold. Be washed
& hung out the clothes but it
came quite a snow storm
Dr McLeay & Bert went.
Maudie suffered something
awful with her hip last
night & to day until 8 night
John went to mill this day
noon & went for Grace to
night
