187 DAYS PAST

178 TO COME

The Vital Element of the Hemoglobin

is its organic iron. Hemoglobinemia is the blood deficiency especially characteristic of Chlorosis. **Pepto-Mangan (Gude)** supplies the iron and manganese, in quickly absorbable form, to fortify and increase the hemoglobin of the vital fluid. It does this without disturbing digestion, and is, unquestionably, the most agreeable, dependable and generally available preparation with which to accomplish this necessary purpose.

Windy & cool,
Mrs McLeay came here &
brought a cow to pasture
Stayed for dinner then
after dinner Maude & Mella
took her & Gene
home & took their music
lessons. Had a swarm
of bees & they ran away
Maude & Gene went to Piper
Billey & Dolley & Mariah
