149 DAYS PAST

Tuesday

217 TO COME

The Direct Loss of Blood

caused by acute hemorrhage must be compensated for. First of all, by saline infusion to replace the volume of fluid, and subsequently, by recreation of red cells and hemoglobin. Pepto-Mangan (Gude) is the most available agent for the latter purpose, as it is so readily tolerable and immediately absorbable as to insure the rapid and complete assimilation of its blood-building ferruginous and manganic elements.

Weather

Temp.

Rained hard. Men came to put up mill.
Took maid and went for her.
Finished bedroom. Mother's ankle
not much better.
