277 DAYS PAST

89 TO COME

A Stimulus to Hematogenesis.

Iron and manganese, in organic combination, are the most efficient agents with which to encourage and stimulate blood construction. Pepto-Mangan (Gude) is the most eligible and available of such combinations, because of its palatability, ready tolerability and absorbability, and its promptly efficient hematinic action.

Weather

Temp.

A fine day John & I
went to Cuyahoga for dinner.
When we came home Dr
Pickering was here. Girls
wheeled to school. John & I
finished the potatoes
before we went. Clarence
Boy cut sils corn after
dinner
