255 TO COME

Simple Test for Urobilin.

It is often of interest, especially in cardiac and hepatic cases, to test the urin for urobilin. The writer advocates the use of copper sulphate for this purpose. To 10-20 c.cm. urine add 20-40 drops of a 10 per cent. solution of copper sulphate; shake gently and add 2-4 c.cm. chloroform. After shaking carefully once more, the chloroform is allowed to settle to the bottom of the test-tube. Urobilin colors the chloroform from yellow to dark red, according to the amount of urobilin present.—Hausmann; *Deutsch. Med. Woch.*

Weather

Temp.

Much cooler but fine
Maudie drove Melba & Schgol, &
went for her. Joe finished throwing
the wood in the wood-shed. I was
planting onions in the large gar-
den this morning. Maudie has
been cutting out vias to for her &
Melba to night. Maudie took her
music lesson this afternoon.
Cvelin was over & changed
a setting of eggs. We had a
squaw & a little box with baskets
Maudie bought six baskets & Joe
bought one.
