28 DAYS PAST

337 TO COME

### Puerperal Eclampsia

1. Albuminuria is the most uniformly present symptom of preëclamptic toxemia.

2. Its persistence, in spite of treatment, is more significant than its quantity.

3. Albuminuria, rise in blood-pressure, and edema are unfortunately "grouped" in their severity.

4. The child's interest in induced labor is identical with the mother's.

5. Eliminate vigorously before starting labor.—Skeel; *Cleveland Med. Journ.*

Weather Thawing & Snow Temp.

nearly all gone. Sleighing spoiled: Eugene & John went to look for a bag this morning. Snowed manure the rest of the forenoon, but snowed this afternoon. I took them to school & went for them. Finished the velvet quilt to night. Was in to see Mrs Harris. Drove Bill to Kydick
