252 DAYS PAST

113 TO COME

Sinus Suppuration, Acute.

Apply 4 per cent. cocaine solution on cotton applicator, passed between end of middle turbinate and nasal wall. Follow by a cleansing alkaline solution and an oily spray containing menthol. To reduce pain and promote drainage: Hot, moist applications over whole face. Salicylic preparations, acetphenetidin, and quinine, to be used as indicated. Free catharsis. Irrigation of frontal or maxillary sinuses unnecessary unless there is trouble in antrum traceable to carious tooth. Vacuum treatment by negative air-pressure often useful.—Lemere.

Weather

Temp.

Very warm
John went after Eugene's rake
wheels & Mella road to school
with him. Maudie didn't
go, so Maudie went for Mella.
Celine & her mother was over &
I was over there. John walked up
to Kingsmill before dinner.
This afternoon he was bunching
up oats, I was canning peaches &
drying jelly. Mariah 13
