151 DAYS PAST

Friday

215 TO COME

Antitoxin Therapy,

in addition to the profound diphtheritic poisoning due to severe Klebs-Loeffler infection, is more than likely to induce a secondary Anemia, which requires early and efficient hematogenetic medication. **Pepto-Mangan (Gude)** is especially adapted for administration to children, because of its distinct palatability, ready tolerability and prompt absorbability.

Weather

Temp.

Warm

Girls went to school.
Mella & I was getting the
kitchen ready for the
dinner. John worked
on his corn & round
bun & Mrs Apple & Gene
I came for Grace
