52 DAYS PAST

314 TO COME

Syphilo-Dermo-Urologic Aphorisms.

It is not an unusual matter for an arthritis or an iritis to occur, during the course of a gonorrhoea. It must be borne in mind that the same conditions are apt to supervene in subsequent attacks of the gonorrhoea. It is also a good idea to inform such patients that they may expect such to be present, at some future time.—*Amer. Journ. of Derm.*

Weather

Temp.

Snowed nearly all day. Melba took Grace to school and went for her. Melba brought Mrs. Thompson up when she came from taking Grace to school this morning. Melba went over to Mr. Appleford's with Grace. Mama took Mrs. Thompson home after supper. Mother took my quilt off quilting frames to night. Received some little rose bushes from Jessie M. Good. Cats had an awful fight, ha ha.
