

to feed up and get the eggs in the right pens of the egg baskets. This is just a school hay from down near Kingston but doesn't seem like a bad sort. I spent most of the after noon washing the buggy. Frank worked up the plum orchard and Dad sowed oats on it and I sowed rape seed then Frank harrowed it. He went out and plowed when he got through. Dad, Enah and the baby drove down town after I got the buggy washed. I worked till dark to night raking up the lawn and then went over to Jack's and got an egg tester and tested out my two settings and just took out three eggs.

Sunday April 21<sup>st</sup>

Enah and I walked down to church this morning as it rained hard during the night and this morning and we didn't want to get the buggy dirty. I stayed down and had dinner with Auntie Alice and Aunt Ida but Auntie came over here to dinner with Enah. I spent the after noon and evening with Mary and had tea at Miss Kerney's. Mary and I went to church and then walked up to ask after old Mr. Martin who is very sick with pneumonia. Cloudy but mild.

Monday April 22<sup>nd</sup>

It rained a little again early this morning and has been cloudy and windy most of the day but looks clearer to night. It was too wet to do any thing on the land so this morning we moved a couple of yags of hay over to the horse stable we didn't put on a full load as we thought the ground was too soft. This after noon I raked and I took a very small pig over to the cow stable and Dad went over with Com. M. Pride to operate on a pig. I got some more raking done on the lawn to night. Gordie Baughner was in to night to look at my red steer but only offered me 8/2c for him so I decided to feed him for another month. Dad had a letter from Dick to day saying that in ten days he resign soon as he is now certain that he will be drafted although he has not had any notice from the Military Authorities yet. He hopes to go out and see Granddaddy and spend a week on some ranch out there learning to ride.

Tuesday April 23<sup>rd</sup>

I sowed clover seed on the wheat back of the barn this morning. There doesn't seem to be much chance
