Saturday, January 18

18 DAYS PAST

348 TO COME

Nov. 24, 1906.

Dr. S. S. Thompson, Washington, D. C., says:

"I tried your **Pepto-Mangan (Gude)** in a prolonged case of typhoid fever. The patient had had three severe intestinal hemorrhages which left her much exsanguinated and weak, prolonging convalescence. She also developed a very large bed sore which showed no signs of healing until after I had given her one bottle of **Pepto-Mangan**. The patient is now almost well and the blood examination shows a marked increase in the red blood cells and hemoglobin. I shall always use **Pepto-Mangan** in my practice wherever indicated."

John broke his sleigh again
he hitched it behind
the cutter, & took it down
with old Mariah, & left
it-
