

Thursday
Tuesday July 25th

First thing this morning we put off the load that was in the barn and then Bill and Daddy hauled in the rest of the wheat. They brought it in in two jags. They put it over the granary so spiky and I did not have to help them. I tore down the fence in front of the drive shed and set it up. When Baby and Dick went back the lane to trim the trees we put out last spring after first helping me to mow away the alder. After the wheat was in they hauled in the remaining two jags of seed. They got through a little of the noon. Just Smith came over and started at the house this afternoon alone. Quint came over and stayed all the afternoon. When the alder was put away we went and cleared up where the old stone table was and got enough wood for

thashing. We also hauled the big stones away from there and put them up against the big barn. Quint and I fowled around shooting arrows till we broke or lost them all.

After tea Bob Plapic came over and gave Dad some money for the pasture and Emery the person came and said he start work on the traction in the morning. Then Cuah and I printed some pictures, we had eleven good prints and only spoilt one.

The Martins brought the piano this morning and Cuah has been trying it off and on all day. We all like it very much. Baby and Bill very much. Baby and Dick were all through the woods at the back of the place this morning picking out trees and trimming them to plant out next spring.

There was the same cold wind to day as yesterday calming completely to night.
