134 DAYS PAST

231 TO COME

The Eye in Diagnosis—(Continued).

Scarlet fever and measles usually start with a catarrhal conjunctivitis.

Syphilis causes iritis, choroiditis, optic neuritis, vitreous opacities, gummata of the orbit and paralysis of the ocular muscles. Inherited, causes interstitial keratitis.

Nephritis may cause edema of the lids, chemosis of the conjunctiva, and always causes albuminuric retinitis.—*Russell; Diet & Hyg. Gazette.*

(Continued second page following.)

Weather

Temp.

Fine Eugene ploughed
the garden & he & Harry planted
the potatoes. Then after dinner
they drew straw & fixed fence
& did odd chores. The girls
drove themselves to school
Edna came part came
home with Mella & Mella
was at Edna's for dinner
& stretched my curtains & put
them up. Got last night.
