

Thursday November 12th

Did chores and husked corn all morning. This after noon Dick and I drove to Jim coe. Dick got his photograph taken at Mowes and I took a lot of harness up to Church's to be fixed. Dick and hung around town till most of it was done, shot two or three games of pool with Dick, first games I ever played. Didn't do so badly considering. I had to leave a bridle up there, we left Jim coe about six as it was fairly late when I had my tea. Cloudy most of the day and inclined to be rainy but not cold.

~~Dad started to plow the plum orchard this after noon, awful job. Young sucker from down the bank came through date ran back to day.~~

Fri day November 13th

It rained a good part of the morning and I drove the bays down to the bank & school. During the morning a terrific wind came up and lifted the top of the straw stack and flopped it between the stack and barn. Dad & I discovered that Charlotte's heifer was under it but we could hear her lowing. I took us quite awhile to dig her out but she didn't seem very bad. She was up again the stack as the big weight wasn't on her. Dad & I went down town before dinner and got our lumber at Tommies. This after noon Dad plowed in the plum orchard and I did chores and husked a little corn. It was cloudy windy and rather cold this after noon with occasional spits of sleet.

Sater day November 14th

I spent the morning doing chores. Frank helped me huck some corn for the pigs and then went downtown after some jars Harry Dyer came after his cow and calf. This after noon Frank and I sorted out another bit of potatoes and found a lot of rotten ones. We husked a little more corn. Frank went back to the gully and found snow drift in 3 am. Two wheat ears brought him up. The others were all right. Dad got in a full day and finished the plum orchard. He hauled in the potatoes we sorted to night. After tea he & Frank killed and dressed a couple of rabbits. County, County's wife & I were over for a little while this after noon. Sunny but cold east wind.

Sunday November 15th

It rained steadily all day so none of us went down town but sat around and read. Ernah and I had a piano & horn concert this

after noon, we don't come home last nights so we don't know what happened to him over any of the news. Very windy night.

Monday November 16th

Dad & I took the plow and wagon back after the gully this morning and loaded up a load of rails of John Wess' line. He came over and said he would bring his engine over and bring them up for us when we got them all hauled. Dad started to plow the old old orchard & took in a load or so of the bluegrass field to plow off the little gully. He plowed all the afternoon and got a good start made. I did chores most of the afternoon but went outside and put on another load of rails for Dad, to haul up to night. Tonight I went down to a surprise party at Billy Boighold's which Elva and the sewing club got up. Had a great time. Bill Bush came and borrowed the hay back to haul a load of horses from Jim coe. It has been very cold and windy all day and is freezing hard to night.

Tues day November 17

It was foggy up solid this morning and very cold and windy so Dad didn't take the teams out although he thought he could have plowed in the sod. He killed and plucked a couple of chickens and I went back to John Wess' to see his cement fence post moulds. I was over there quite awhile. Didn't do anything much this afternoon. Dad went down to Sam Lantz and got two turkeys and I went over to Jack Donatello to see if he wanted to buy my roosters. He said he would come over soon to look at them. Dad & Frank went down town as much of all wasn't so well to day.

Wednesday November 18th

Bucky came over this morning and we hauled a load of hay over from the big barn to the other and put it over the bullpen. We then went out and divided all the big shocks of corn in one row and hauled them in this afternoon. Burt came over to tea and he and I went to Jim coe to night. Burt went over to the armories but didn't get home until twelve. County was over here all the afternoon and is going to stay awhile. Mrs. Dr. Bird was here all day. Cold & windy.

Thurs day November 19th

Dad & I unloaded the load of corn this morning and Bucky came over and he & I went out and divided another lot of big shocks
