8 DAYS PAST

357 TO COME

Some "Dont's" in Cardiac Therapeutics.

Don't allow a patient with an uncompensated valve lesion to be out of bed.

Don't let a child or young person with chronic valve disease get out of bed until compensation has returned to the heart and circulatory equilibrium has been maintained for at least one month.

Don't keep elderly patients with myocardial degeneration in bed longer than is absolutely necessary to secure adequate compensation.

Don't give children digitalis, unless there is absolute indication for its use.—*Med. Review of Reviews.*
