201 DAYS PAST

164 TO COME

The Gastric Mucous Membrane

is likely to be distinctly irritated by the regular administration of the metallic salts of iron. The ferruginous content of Pepto-Mangan (Gude) is in the form of an organic peptonate, its most tolerable and acceptable form. It may be given regularly as long as hematinic and tonic medication is necessary, without irritating the stomach or producing constipation.

Weather

Temp.

Warm & washed
Paper helped me a
little while in the morning
Then the boys cut nearly
all the wheat & cut hay
east of the garden, Eugene
went to the north place
to get Mr Wright to cut
the wheat this evening
Mrs Dr Gray & Maude was sent
to Dolly 14½
