331 DAYS PAST

TUESDAY

35 TO COME

Prompt Hematogenesis.

The profound anemia that sometimes follows the invasion of the blood by the malarial plasmode is due to the corpuscle-consuming action of the parasite. Prompt hematogenesis is distinctly indicated and **Pepto-Mangan (Gude)** is an ideal preparation with which to pleasantly and effectually repair the damage.

Weather

a fine day

Temp.

John went to Edgemoor
& helped him shingle
his new house. Girls went
to school. Melba walked
to Aymer & she & Mrs Blum
went to Tolsonburg. Melba
had some teeth filled
& made Melba a box for
her rabbits
