MONDAY

155 TO COME

Iron's Co-Partner.

Among all of the many iron products none has proved as generally acceptable and promptly assimilable as the organo-plastic form of this metal in **Pepto-Mangan (Gude)**. The ferruginous element is combined with organic manganese, iron's side partner in reconstructive therapy. **Pepto-Mangan** quickly restores vigor to the blood and, because of its palatability and blandness, is especially valuable in pediatric practice.
