### The Dietetic Treatment of Urticaria.

The two articles of diet that should especially be avoided in urticaria are proteids and leguminous vegetables (peas, beans and the like). The patient should receive tea or coffee with much sugar, bouillon, lemon juice, grape juice, coarse bread with plenty of butter, rice, farina, cereals, lettuce, potatoes, raw and stewed fruit. The dietary should be made adequately nutritious by means of a plentiful supply of sugar and butter.—Salomon; Wien. Klin. Woch.

Weather

Temp.

Warm rained a little  
last night. I took the girls  
to school to day & Eveline  
went for them, drove old  
Mariah & John along the  
all day. I was in to see  
Mrs. A. G. nature. Eveline was  
here for tea. I settled with  
Love, Gilby, Stratton  
Yonell & Wron & Dr. Wood &  
Mrs. Campbell. Mariah B

was here at the gate  
at her father's
