162 DAYS PAST

MONDAY

204 TO COME

Obstinate Hiccough.

Adrenalin is warmly recommended by Segal (*Journal des Practiciens*, Aug. 23, 1913) in the treatment of obstinate hiccough. He gives 10 drops of the 1:1000 solution. The drug has worked where all other measures have failed. It seems to act in an antispasmodic manner similar to that in asthma.

Weather

Temp.

Looked like rain but didn't, was cold this morning, & then turned out warm then colder to night. Melba & I took Maudie to school then Melba, Mrs. Seline, & I went down to the cemetery. Then Melba went out for her & Petrus Crane, came home with them & stayed all night. Had a swarm of bees. John drew his last load of gravel for the road.
