Got up pretty early this morning
after breakfast. Dad and I went down

his fanning mill and cultivator. Mr. Newell
was here when we got back and he
and I put about fifty bushes through the
mill for seed which took us till nearly
noon. Daddy cultivated the wheat
ground this side of the gully. I laid down
at noon and went to sleep when I woke
up it was about half past two and
Bill Barlow was here talking to Quak. He
came down to the meeting last night and
missed his train this morning. Quak and
I were going town this afternoon so we
took Bill down to catch the 3:15 and he had

I had to get Joe's shoe and I took Geo
around to the Greenhouse to get some bones
for the sheep. We did not get home
