82 DAYS PAST

284 TO COME

May 6, 1907.

Dr. B. Frank Oswald, Cleveland, Ohio, says:

"The bottle of Pepto-Mangan (Gude) was received, and I gave it to a poor little girl, who was very much improved in appearance, appetite and general health after taking it."

May 25, 1907.

Dr. J. E. Sheldon, New Dover, Ohio, says:

"I used the sample of Pepto-Mangan (Gude) sent me, in a case of anemia, and was so well pleased that I am still using the preparation. I think it is by far the best blood-builder we have to-day."

A dull day all day
 rained about noon. I had
 a thunder shower. It just
 poured & the wind was
 something terrific when
 the girls came from
 school. I boiled in the day
 had about three quarts
 the girls had to wash
 Mariah the bug's harness
 (John Drew) load harness Mariah's.
