

June Friday, 3 1927  
Jean took me to town with her in the morning to help ship the cream and do some shipping while Dan dived turnips ground. Spudded chittles in straw bins till noon and then spudded chittles in osts and laid ponds after dinner till Mr Webster was ready to go to work. Raid out line of poles, roofed them and planted the first one.

Saturday 4  
Next morning. Filled tank in osts after breakfast. Jim helped fix latch on door and then spent most of the day housecleaning in the cellar. Got Dog here had some time. Dug my first hole for hydro poles before milking time. Had a flud off goat down at night along with Eleanor & Melville. Got the Builys wedding day.
