362 DAYS PAST *FRIDAY*

4 TO COME

Improved Technic for Sterilization with Tincture of Iodin.

Dedolph applies the tincture of iodine with an atomizer. The spray penetrates into every crevice, the fingers are not stained, there is no loss of the drug as when it is applied on cotton which is then thrown away. Another advantage is that the patient is spared the pain of contact as the wound is not touched except by the spray. Sloping and low, hidden surfaces can be reached better by the spray than by fluid.—*Deutsche Med. Woch.*

Weather

a little colder ^{Temp.}

a few flurries of snow. I washed. John has been building fence. had Clarence & Cecil helping trim an hour, or two this afternoon. Ed Thompson Boyde, Arthur Turrell & George Rightman were here a little while. Mr Turrell bought one of Melber's rabbits gave her \$1.50. John was over to Clarence's
