

Wed, 13,

July 13th 1892
Another hot day partly cloudy
this for noon, a very heavy sun
shine shower at noon followed
soon after by a thunder shower
the heat was intense previously.
Called at the residence of Mr. Harding
for a little while to night

Thurs, 14

Still very hot this morning, a light
breeze sprang up to day but did
not last long, very hot this after-
noon thermometer 85° in shade
a number of young folks incl-
uding myself spent the evening
at ~~Richard's~~ Mr R. Zertheveys
in honor of the Birthday of his
eldest daughter Minnie

Fri, 15

partly cloudy this morning,
clearing off and remaining clear
and hot all day, clouding over
at evening. Threatening rain, soon
after a heavy rumbling could be

Fri, 15,

July 15th 1892,
heard in the west, and a stiff
gale was blowing, driving before
it, the most angry looking clouds
I ever saw, appearing like a
tornado or cyclone, accompanied
by terrific thunder and lightning
but very little rain, one notable
pecularity about the lightning was,
that it appeared purple cast.
Sat, 16,
Mostly clear, but very cold, the
thermometer having dropped from
85° in shade yesterday, to 60° to-
day, a very sudden change,
at night there appeared the
the most beautiful display
of Northern lights, I ever witnessed,
the reflections on
the Southern horizon were perpet-
ually dancing, like the reflection
on the was produced by a mirror
kept in motion
