256 DAY

Friday

110 TO COME

Surgical Hints.

If healing does not occur under the customary treatment in ulcers of the leg, even when of a distinct varicose type, it is well to consider the possibility of a syphilitic element, although there may be nothing in the history to point to its existence. A course of specific medication may effect a material improvement in cases which have resisted all kinds of local treatment.—*Int. Journ. of Surg.*

Weather

Temp.

Very cold at night
Gertude Mills brought
two loads of girls out, & they
had a corn roast. Gebe
Appleford came for Grace
& they stayed all night.
John drew manure, & we
barked the sheep. In box
was over, girls went to
school, Aunt Bell & Jess's
Scott. was to Louise's Maria's &
