349 DAYS PAST

16 TO COME

Well Borne and Beneficial.

A London, Eng., physician who does not wish his name published writes: "The **Pepto-Mangan (Gude)** was given to a young anemic patient, by whom it was borne well, setting up no digestive disturbances nor constipation, and altogether she appeared to be benefited by it. She certainly liked the flavor of it better than any other preparations of iron she had taken."

Weather

Temp.

Very Cold this
Morning so cold that I took
the girls & went for them
Joe went to Aylmer with John
this morning then when we
came home, we did the
washing. I made up my
travelling besides, John
took more lumber & the
windows to Cengenes
