

MEMORANDUM FROM 1903.

The summer of 1903 was quite cool, not at any time  
were we wanting ice. Crops of roots were good, while  
corn was poor.

The most remarkable thing was that November to the 17<sup>th</sup>  
and October were entirely without rain, and the  
wheeling at this time exceptionally good, then snow  
came on hard frozen ground & stayed & stayed.
