50 DAYS PAST TUESDAY 316 TO COME

Management of Surgical Cases—No. 2.

Rectal cases need mild carthartics and sitz baths until entirely healed, and longer.

Prostatic cases often require bladder washing from time to time as indicated by the condition of the urine.

Patients who after operation have more or less stiffness of muscles or joints should receive massage or Faradism persistently until completely relieved.—Leigh; Int. Journ. of Surg.

Weather

Temp.

Rained & thawed all day & is still at it to night! South west wind. When it wasn't raining you could see the fog blowing. Girls went to school with the cutter but will have to take wheels in the morning. The Leaverley girls didn't go to school. I crashed. Cecil was over to the driver barn in the morning & Mr. Terry was over this afternoon. Joe & Lightman went home from Mrs. Thompson's. Mariah to
