

Mar 12th 1893,

for a visit, and also Miss Hoppins
sister of the present School teacher
Jim Lane was also present we
spent a the time enjoyably
Miss Watts and I had one of
our old time sings.

Mon, 13, Quite cold bleak and cloudy
today colder to night.

Tue 14, Cold most of the day thawing a
little, mostly clear.

Wed, 15, Quite cold this morning cloudy
over very heavily and commencing
to rain and continued most all
day, turning colder at night.

Thur, 16, cold bleak and very windy to
day

Thur, 16, Another cold bleak day but the
wind abated at night and
cleared off fine

Mar 17th 1893,

Mon, 17, This morning a very strange
Phenomenon appeared on the Sun
Observers will long remember
it, it was Halos encircling
the Sun having the appearance
of Rain Bow and remarkable
for its Prismatic Splendor.

Tue, 18, Very fine day quite cool but
thawing a little during the
middle of the day

Wed, 19, Beautiful this morning but
very cold, clouding over in
the afternoon but not stormy

Thur, 20, Lovely today thawing some

Fri, 21, Another fine day considerable
warmer than usual

Sat, 22, Fine all day but some cooler
than yesterday,

Sun, 23, Cloudy all day and very windy and
cold
