## WAR TAXES

---

On April 15, 1915, the Special War Revenue Act became effective as follows :

### **WAR STAMP TAX ON LETTERS AND POST CARDS**

A "War Tax" 1c. Stamp, in addition to the ordinary postage, must be affixed to each letter and post card mailed in Canada, for delivery in Canada, the United States, and Mexico; also on letters and post cards mailed in Canada for the United Kingdom and British possessions, or wherever the two-cent rate applies.

**Failure on the part of the sender of a letter or post card to comply with the above, such letter or post card will be sent to the dead letter office.**

Wherever possible and procurable, stamps on which the words "War Tax" have been printed should be used for prepayment of the "War Tax," but should ordinary postage stamps be used for the purpose they will be accepted.

The "War Tax" Stamp should be affixed to the upper right-hand portion of the envelope or post card. Circulars, catalogues, newspapers, and parcels are not subject to the "War Tax."

## Eclipses, 1918

In the year 1918 there will be three eclipses, two of the Sun and one of the Moon.

I. A total eclipse of the Sun, June 8th, visible in Canada as a partial eclipse. The path of the total eclipse commences in latitude  $25^{\circ} 41'$  N. and longitude  $130^{\circ}$  E. in the North Pacific Ocean, south of Japan and sweeps over the water until it strikes the coast of America just north of the Columbia river in Washington Territory, then continuing easterly and southerly across the United States for some 2700 miles with tremendous velocity passing over the cities of Denver, Jackson and numerous towns and villages in a path about 60 miles wide, it reaches the Atlantic Ocean near the middle of the Florida Coast line in considerably less than an hour and finally ends in the Ocean north of the Bahama Islands. The duration of the total phase is 2m. 55 secs. on the Pacific Coast and becoming less until the end, being less than a minute on the Atlantic Coast. The eclipse begins in Toronto at 5h. 20m. p.m. and ends at 7h. 22m. p.m. Magnitude 0.67. In Winnipeg the eclipse begins 4h. 7m. p.m. and ends at 6h. 15m. p.m. Magnitude 0.744. Victoria is just outside and to the north of the path of totality, the eclipse beginning at 1h. 35m. p.m. and ending at 4h. 6m. p.m. the greatest magnitude being 0.965. All times are Standard Meridian times.

II. A partial eclipse of the Moon, June 24th, the Moon enters the Umbra 3h. 46m. a.m. Middle of eclipse 4h. 28m. a.m., Moon leaves the Umbra 5h. 10m. Central Time. In Eastern time one hour later. Mountain time one hour earlier and Pacific time two hours earlier. The Moon will be rather low down. Magnitude of the eclipse 0.135.

III. An Annular eclipse of the Sun, December 3rd, invisible in Canada and the United States, visible in South America.
