324 DAYS PAST

TUESDAY

42 TO COME

Blood Pressure.

Jackson says that blood pressure examinations before and after exercise, together with observation of the pulse rate and the general signs of respiratory embarrassment and cyanosis, are a valuable means of estimating cardiac efficiency, and applied to those past middle age, or presenting cardiac irregularities or murmurs, or in whom there is any reason for suspecting degenerative processes, they furnish valuable and permanent information as to the condition of the heart muscle.

Weather

Temp.

Rained nearly all day. Maude & Grace went to school. I took the chickens, got me a new pair of rubbers & new under ware & two new pairs. Carl & Hazel was here in the evening.

Billy & Maude 5-
