64 DAYS PAST

MONDAY

302 TO COME

May 1, 1907.

Dr. J. M. Watt, Toronto, Ohio, says:

"I beg to say that the bottle of Pepto-Mangan (Gude) came duly to hand and as I was somewhat anemic myself I used it personally and was much benefited by its use. I use it more than any other preparation of iron on account of its not disturbing the stomach. I am pleased to say it is a fine remedy and always reliable."

A very rough night & kept
snowing & blowing all day,
but to night about seven P.M.
ceased & is be light & still
kids didn't go to school.

The snow banks are as
high as the old cellar
top. We was all home
all day. Maudie was not
well enough to go to school,
& it was so stormy Helba did
not go.
