

# Hooray! For Borden

Friday September 22<sup>nd</sup>

Cut corn all day. Dad worked on the above ground all day. He took the little team out this morning as he thought I would be working the big team but he found the ground on this side was too wet when he wanted me to disk so kept on with the till now. Dick came home at noon with the tidings that Borden was in with a majority. He also had the joke which I will particular. The liberals were just simply shunked owing to McCreery. If they had never got it into politics they are more than likely here in power now. Most of the cabinet ministers were defeated including <sup>the</sup> blodding, Paterson, Graham, Sir Fredrick Borden and Mr. McKenzie King. Manitoba did not send one Liberal candidate but Alberta and Saskatchewan both went Liberal. Nova Scotia New Brunswick went Liberal and Ontario and British Columbia Canada is saved from Yankee dom.

were conservative by very large majority and B.C. Island was a tie two of each. There were exhibiting Nationalists. I don't want to be different from what we expect to do as we thought in the end. It was all to be returned and there was no chance of Borden's being elected. Dick told us tonight that Mr. McCreery did the morning

Mr. Larry & me were this morning with deep snow and a crow call but only got two. I took the gun back this afternoon and nearly disarmed my shoulder shooting a hawk. I never killed with a gun. I shot a long fish once but he was selling it.

We got up fairly early this morning but did not get started to work very early. Paddy and I disked all morning and got the wheat ground all gone over. He got Blake's cultivator with the little team. I cut corn from 290 till 400 this pm. Mr. Blake came over and helped Dad run out the cross ditches in the wheat field. About 4 o'clock Paddy came back and he and I went to separate our cattle from Watson's and fix the fence where they get in but we found they were not together so we did not bother putting Watson's out as it is his fence that has to be fixed any way. Coleman's call was in our side this aft. but we could not find where he got in but we think it was through the bark. Two Jim. Pannister and another fellow were down in Coleman's gully and had quite a lot of mushrooms.
