

after a while and he told me I could have
the job of ringing the bell and pumping
every Sunday morning through the summer
as he has to go down to the boats at that
time. I saw Roy D all up town and talked
to him for a while and then he got his
father and we went out in their gasoline
launch around by the reef and then up
the shore to meet Hay Creek and back.

We saw John Gordon out in the "I T"
We got back about 5:30 and watched
Ivory's try to make their engine go. far about
half an hour. They have one of the boats
Killey built and put the engine in her
in the "Cygnet" in her and she won't go.
I went over to Stuby's for tea and Enah
came down soon after. Calvin Tall and Curran
Willie had been over there and had just
left. They told Enah that Henry Reeve had
bought the grocery department of Seafield's out.
Enah and I went to church and I pumped
for Miser, as he had to go and see his girl.
They had a special sermon and service

for the coronation and it took a little longer
just before it was over it began to
rain and when church was over it was
pouring. Enah and I waited in the church
porch for a long time with Dunt, Maude
and Mr. and Mrs. Stokes. An able seaman
off the "Vigilant" came in for a while.
Mr. Stokes and Mr. Hoegan got some coats
and umbrellas and we thought we would
wait till it was over, but after waiting
a long time we decided to skin for home.
We went down to Stuby's and Enah was
going to stay there all night and I was
going home to tell Daddy when he came
in attired in a rubber coat and red waders
off Dysis. He stayed for a while and then
went home and Enah and I stayed at
Stuby's all night. I slept with Dunt.
