103 DAYS PAST

263 TO COME

Saturday
To Overcome the Lassitude,

anorexia, dyspnea and headache of the Chlor-Anemic invalid and to dissipate the characteristic pallor, Pepto-Mangan (Gude) is "par excellence," the one palatable, tolerable and dependable hematinic. It quickly relieves the unpleasant symptoms, increases strength and weight, and restores the feeling of "well being."

Weather

Temp.

Rain Rain off on all day; Maudie & Nella went to W. L. L. for beer. Her boy was over this morning. Mr. Young came for a load of hay & John drew it for him & he was here for dinner, & they took it after dinner. I pitched a rooster for Mrs. Pickering & he came to two dollars & nine cents. Girls got me a new pair of rubbers. Nella took Grace & went for her. Maudie stayed home & studied.
