**The Genesis of Hemoglobin**

is the principle aim and object to be attained in the treatment of Chlorosis. In addition to hygienic and general supportive measures, a palatable, non-irritant and readily absorbable form of iron is indicated. **Pepto-Mangan (Gude)** is unquestionably prompt and efficient as a corpuscle constructor and hemoglobin creator, in all forms of hemic impoverishment.

**Weather**

**Temp.**

*Fine in the morning. Albert came in the morning and got his pig. It weighed 276 lbs. We washed to-day. Mr. Youngs came just before dinner. It snowed towards night quite a bit. Dad went over to Mr. Coy's this evening. Mother cut my waist out to night. Some Mr Lennan was married at high noon to-day.*
