155 DAYS PAST

211 TO COME

April 11, 1907.

Dr. James Munsie, Cleveland, Ohio, says:

"I received the bottle of **Pepto-Mangan (Gude)** which you were good enough to send me on the 14th of February. I used it at once in a case of general anemia and neurasthenia in a girl of 19. The results, so far, are startling both to her friends and myself. The color is commencing to come into her cheeks and the gain in weight is satisfactory. I believe **Pepto-Mangan (Gude)** to be a powerful reconstructive."

Monday we washed & cleaned the summer kitchen & painted the bee hives. Wilfred was up twice. Melba was not well all day. John worked on the corn fields getting it ready. Aletas eggs that I set for her has hatched thirty two. The condense man was here.
