

Saturday April 28th

Tom and I got two more stretches of the fence made this forenoon but he had to take one of the rows away this afternoon so we couldn't work at the fence. This has been a disappointing week as I had hoped to be all through with the fence by now and ready for seeding and spraying next week as present appearances indicate that they will be ready for us. Tom's trip to Toronto on Wednesday was absolutely useless as the specialist that the Board had engaged to examine him was out of town on his holidays. They kept him and a dozen or so other men at the Christie St. Hospital till four o'clock before one of them had the bright idea strike them to call up the specialist to see why he hadn't showed up. They then coolly told him to appear again next month. I spent the afternoon planting the rest of the nursery stock and clearing up around the yard. Worked till dark and then the Harvey Evans came in for a minute and stayed about an hour. When they left I did chores & had my tea. Frank came out this morning and took Mary down to see Mrs. Ray Hammond about this girl she is getting and Jim drove out with our car and over paper this afternoon. Fine day but cold North East Wind.

Sunday April 29th

Spent the forenoon choring around and expecting Frank to call up to see if we wanted the car. He didn't so I called Berny Olier up after church and she said Frank had been in church with Mrs. Pickford & Gene and she thought had gone down town for dinner. Dick was going to Toronto this afternoon so he stopped in and told Frank & we waited to go to town this afternoon so he & Gene drove up about 2:30 and we all went down. I went up to a practice at the lodge room and Mary & the kids went to Dentys. Mary also went over to see Mrs. Hammond. Gust & Gladys were at Dentys bidding a fond farewell to all as they are leaving for Fort Francis tomorrow. Frank brought us home about five o'clock and came out and got me again at 9:30 and took me down to the Sunday night concert in the Hall. Old Dr. Law died last night very suddenly. This has been a fine day but strong wind. Will.

Monday April 30th

Tom and I got the last two stretches made on the fence this morning but still have to run barbed wire up the hill, drive some iron posts and fill up some holes along the bottom. Peterson called up this morning.
