No Harsh Action

is ever noted when Pepto-Mangan (Gude) is selected as the preferred hematic and tonic. It is so free from irritant properties and so promptly absorbable and assimilable as to render it the most generally eligible and acceptable of all reconstructives in anemic and generally devitalized conditions.

Weather

Temp.

*A fine day
but raining to night. Mrs.
Cox & I went to Oylburn
& got Polley shed. John & Joe
was drawing corn from the
south barn, then saw the big
chunks in the wood shed,
then took corn. I did
part of my ironing to night.*
