15 DAYS PAST

350 TO COME

The Handsome Bacteriological Chart,

issued by the American agents for Pepto-Mangan (Gude), is a most useful and ornamental addition to the physician's office. It consists of sixty beautifully colored lithographs of the pathogenic bacteria, and has recently been brought fully up to date by the addition of two excellent plates representing the spirochete of syphilis, and the *treponema pallidum* of Schaudinn. It is an excellent chart for reference, as well as a reliable guide for the laboratory worker.

Weather Warm cloudy Temp.

I took the girls to school. Then in the afternoon John & I went to Ogden, and brought the 6 children home. Eugene went over to help mend Mr. Danes's wind mill. I was in to see Mrs. Levine a little while. Let^t Mrs. Thompson have Mellor's old duck. Mrs. Thompson & Boyde came and spent the evening Lydia 7 miles Bill &
