It Quickens Anabolism.

The periodic estimation of erythrocytes and hemoglobin percentage almost invariably demonstrates an increased functional efficiency of the blood after the regular use of **Pepto-Mangan (Gude)**. This hematinic tonic quickens all of the normal anabolic efforts of the economy and thus assists materially in the absorption, assimilation and systemic appropriation of the nutritional elements of the natural food stuffs.

Sprinkled a little
this afternoon, I went up
with Aunt Belle picked
cherries this morning, the
girls did the work & I
had bee time & mella
has been cleaning the
cellar, this afternoon Maude
& a swarm of bees had a
fast race but the bees
came out ahead. Maude
took her white home!
