### An Ample Quantity

of oxygen-holding and oxygen-contributing hemoglobin is necessary in order to insure a blood tissue of full physiologic potency. **Pepto-Mangan (Gude)** enriches the red cells, by supplying, in absorbable form, the organic iron and manganese needed to restore functional activity.

Weather

Temp.

Fair & fine this morning. John drove Kella to school. Maudie went and took her music lesson & brought Kella home. Maudie & I papered the hall. John & Eugene went to Aylmer & Eugene got a new drill. Joe & I washed
